Artepiso

Add dimension to any room with architectural tile. Fresh designs and raised profiles allow you to create one of a kind striking interiors. Creativity has never been simpler. Show your bold side. Artepiso tiles

– Bold, Artistic & Individualistic.

Architectural concrete, also called "reconstituted stone" offers an innovative product for the construction market. It acquires shapes and textures that cannot be obtained with any other material. The tile is designed to be light and easy to install on most walls for simple installation and a dramatic effect.

In addition, Artepiso maintains its commitment to the environment by reusing all water and no artificial light during the production process. The materials used avoid waste during construction and prevent the exploitation of natural raw material.
